PROFESSIONAL SUMMARY

Computer science graduate and technical professional with experience building and maintaining full-stack web applications, administering managed service provider (MSP) client environments, and supporting business systems. Combines software development with hands-on cloud administration, endpoint management, identity, networking, security, and production troubleshooting. Background includes multi-tenant SaaS development, small-business client support, logistics and event operations, data analysis, and technology instruction. Uses modern AI-assisted development tools to accelerate development, automate workflows, and troubleshoot issues across applications, users, and infrastructure.

TECHNICAL SKILLS

Languages and data: JavaScript, TypeScript, C#, Python, PowerShell, SQL, HTML/CSS, PostgreSQL, Neon, relational data modeling, Excel

Web and mobile development: React, Next.js, ASP.NET Core, Django, Ruby on Rails, React Native, Expo, REST APIs, Drizzle ORM, JWT, Tailwind CSS, MUI, Vite

Application architecture: Multi-tenant SaaS, organization- and tenant-scoped environments, PostgreSQL Row-Level Security (RLS), SQL role-based access control (RBAC), authentication, audit logging

Cloud and development tools: Vercel, Render, Cloudflare, Cloudflare R2, AWS, Docker, Git, GitHub, Cursor, production deployment, environment configuration, DNS, SSL/TLS

Content and commerce: Sanity, Shopify, Stripe, Prodigy, Resend, CMS integration, custom catalogs, transactional email, billing and print-on-demand integrations

Interactive and mapping tools: Three.js, React Three Fiber, Mapbox, NYC Open Data API, interactive 3D interfaces, geographic and transportation-restriction data

Systems and endpoint administration: Windows, macOS, Microsoft 365, Entra ID, Google Workspace, GAM, CIPP, Intune, Windows Autopilot, Apple Business Manager, Addigy, NinjaOne

Networking and security: SonicWall, VPNs, DNS, DHCP, Auvik, SentinelOne, Huntress, Duo, Keeper, DNSFilter, Avanan, EasyDMARC, SPF, DKIM, DMARC

Backup and service delivery: Cove, DropSuite, Autotask PSA, Hudu, CloudRadial, ticket triage, end-user support, client onboarding, technical documentation, client portal workflows

PROFESSIONAL EXPERIENCE

Freelance Product Development | Independent

2025 - Present | jakedcl.com

- Build, deploy, and maintain custom websites and web applications for small-business clients using modern web frameworks, CMS platforms, APIs, and cloud services.
- Translate loosely defined client needs into technical requirements, implementation plans, and production solutions.
- Develop responsive interfaces and custom functionality, including content management, forms, search, and SaaS integrations.
- Deploy and maintain production applications using Vercel, Cloudflare, Render, and related cloud platforms.
- Troubleshoot application errors, deployment failures, integration problems, DNS issues, and SSL/TLS issues.
- Provide ongoing technical support for 6 recurring clients across hosting, domains, DNS, SSL, email, CMS platforms, SaaS integrations, and production issues.
- Document systems, dependencies, and support procedures to support ongoing maintenance and troubleshooting.
- Help nontechnical clients evaluate tools, workflows, and vendor platforms and translate technical options into practical implementation decisions.

IT Systems Administrator | KRNL Technology (MSP)

10/2024 - 09/2025 | krnltech.com

- Administered 5 client environments across Microsoft 365, Entra ID, and Google Workspace, using CIPP and GAM for administration.
- Supported 250+ Windows and Apple endpoints using Intune, Addigy, NinjaOne, and Windows Autopilot.
- Resolved end-user issues involving account access, permissions, enrollment, devices, and day-to-day workstation support.
- Configured networks, firewalls, VPNs, and DNS across client environments.
- Used Auvik for network monitoring, device discovery, troubleshooting, and topology maps.
- Supported endpoint, identity, and email security using SentinelOne, Huntress, Duo, DNSFilter, Avanan, and EasyDMARC.
- Diagnosed email delivery and authentication issues involving Microsoft 365, Google Workspace, SPF, DKIM, and DMARC.
- Used Autotask PSA for ticket management, client records, time tracking, and support workflows.
- Automated user onboarding and helped improve client portal workflows using Autotask, CloudRadial, and Hudu.
- Redesigned the client portal as part of the service-delivery workflow improvements.
- Administered Cove and DropSuite backup services and maintained technical documentation.

Audit Intern | NYC Department of Investigation

06/2024 - 08/2024 | nyc.gov/site/doi

- Analyzed structured datasets using Excel and Python to support investigative work in an enterprise environment.
- Produced reports from data analysis to support investigations.

Technology Instructor | NYC DYCD COMPASS STEM

09/2023 - 06/2024 | whizara.com

- Led weekly classes in introductory programming and digital literacy for elementary-school students using MIT Scratch.

Logistics and Operations Associate | NY Design & Construction

05/2022 - 05/2024 | nydacinc.com

- Managed company web systems and digital infrastructure while supporting event-production and logistics operations.
- Coordinated crews, vendors, equipment, and inventory for large-scale events in a fast-moving, client-facing environment.

Frontend Web Developer | BandNada Social

01/2023 - 06/2023 | bandnada.com

- Contributed to web and mobile application development using Ruby on Rails, React Native, and Expo.
- Participated in collaborative Git/GitHub workflows, including pull requests, code review, and team-based development.

Helpdesk Technician | Oneonta IT Services

08/2022 - 12/2022 | suny.oneonta.edu

- Provided helpdesk support for student accounts and devices.
- Supported school printers, projectors, and related campus technology.

PROJECTS

Logiparty | Third-Party Logistics and Operations Business Dashboard

logiparty.com

Technologies: Next.js, Drizzle ORM, Neon Postgres, Cloudflare R2, Stripe, Resend, Vercel

- Designed, developed, tested, and deployed a full-stack, multi-tenant SaaS platform for third-party logistics and business operations.
- Implemented organization- and tenant-scoped environments with PostgreSQL Row-Level Security and SQL role-based access control.
- Implemented audit logging alongside tenant-scoped access and operational workflows.
- Built workflows for jobs, inventory, fleet, crew assignments, and client requests.
- Integrated cloud storage, authentication, transactional email, and billing services into the platform.

Heads Up Trucker | Transportation Restrictions Mapping Tool

headsuptrucker.vercel.app

Technologies: Next.js, NYC Open Data API, Vercel

- Aggregated transportation-restriction data for the New York metropolitan area.
- Brought together height, weight, width, and vehicle-type restrictions in a mapping tool to help visualize transportation constraints.

MetroTapes | Interactive 3D Subway Station Portfolio

metrotapes.com

Technologies: React, Three.js, React Three Fiber, Sanity, Vite, Vercel

- Built an interactive 3D landing page and portfolio around a subway station scene.
- Added animated and moving objects with functional HTML elements embedded in the 3D scene.
- Adapted the interactive experience for desktop and mobile devices.

Drew Della | Search-Inspired Artist and Creative Studio Website

drewdella.com

Technologies: Next.js, MUI, Sanity, Mapbox

- Built a custom artist and creative studio website modeled on a search-engine results page (SERP).
- Implemented search-results-style navigation, tabbed views, and ranked site search across CMS content.
- Provided a client portal for updating media, site information, and other content.

Bannquet | Mountain Weather Dashboard and Outdoor Information Website

bannquet.com

Technologies: Next.js

- Built an outdoor information website combining mountain weather, maps, and blog content.

731 Photography | Print-On-Demand Photo Shop

thomaslurker.com

Technologies: Next.js, Stripe, Prodigy, Resend, Sanity

- Integrated Stripe billing with Prodigy print-on-demand fulfillment for a photography storefront.
- Built a custom item catalog and automated email communications as part of the commerce workflow.

EDUCATION

Bachelor of Science in Computer Science | CUNY College of Staten Island

May 2026 | cs.csi.cuny.edu

CERTIFICATION

Associate Google Workspace Administrator

Credential: credly.com/badges/9e258fee-2bde-4253-9dd5-a10250454644

HOBBIES AND INTERESTS

Geographic Information Systems (GIS), cooking, hiking, biking, photography, 3D modeling, and carpentry. Eagle Scout (2020).
